The screenshot displays the EVA Traffic Manager interface. On the left, a 'Contracts' window shows a list of advertising contracts with columns for Customer, Dealership Code, Start/End periods, and Administrative code. Below it, an 'OnAir Certifications -> Channel (RADIO31)' window shows a list of programmed spots with columns for Date, Time, Count, Position, Length, and Title. The main window shows a detailed 'Advertising program -> Channel (RADIO31) - Area 1' grid with columns for Date, Time, and various program details. A summary table at the top right shows 'Total' and 'All Free' values.

Logger

Powerful Multi-channels Audio & Video Logger

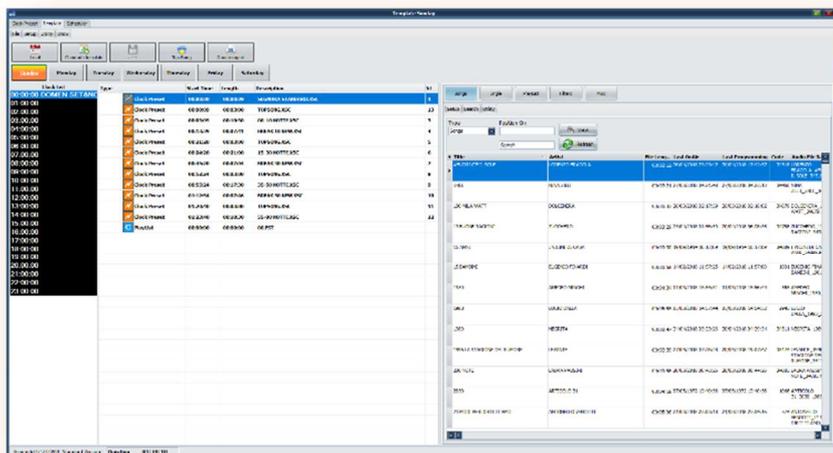

The screenshot shows the AEM Video Logger interface. It features a 'File Settings Utility' window with a 'REC' button and a 'Hide' button. Below, there are two audio recording tracks. Each track shows a waveform and a progress bar. The first track is labeled 'MICROFONO (REALTEK USB2.0 MIC) - RECORDER = C:\A\ - MP3 44100 Hz; 128 kbps; Stereo' and is 'Enabled'. The second track is identical. At the bottom, it says '[Expired:31/12/2099] [Max Num Channel:64] [Logger Enabled]'

The screenshot shows the AEM Video Logger interface. It features a 'File Settings' window with a 'VIDEO LOGGER' logo and a 'Hide' button. Below, there are two video recording tracks. Each track shows a video preview window and a progress bar. The first track is labeled 'TEST1' and the second 'TEST2'. At the bottom, it says '[Expired:31/12/2099] [Max Num Channel:6] [Logger Enabled]'

Powerful set of rules and reports to make programming a breeze; Highly scalable design and an intuitive user interface are the strengths of its success in the radio and music-television programming market.
